

Innbox HD30

Media Center

Play any media you want.

The Innbox HD30 Multimedia Center brings new IPTV and entertainment experience to your home. All your favorite TV shows and movies from your TV service provider or your local video content can be shared to your living room TV from single device. It is not only video player, but also your jukebox to play your favourite music: internet radio stations or locally stored audio files. Additionally, Innbox becomes large photo frame player when you want to show photos from your latest holidays to your friends. All your local content can be stored on integrated HDD in the Innbox, on a attached storage to the Innbox or in your local domestic network accessible over LAN interface. The Innbox plays non-DRM media in any format and DRM media controlled by your service provider.

Use your favorite web applications on TV.

The Innbox integrates your favorite web application you use for media services such as YouTube, Picasa, Flickr etc. With the Innbox you never need to "surf the Web" on your TV, instead you just use your remote control to pick and choose the best digital entertainment.

Web widgets.

You are able to load your favourite web widgets into the system in order to reach additional information by pressing single button. Such widgets already embedded are weather report and RSS feeder.

Unified communications and phone calls.

You can make tool-quality phone call using simple graphical interface on your TV. Establishing video call or conference is just a click of button away. While watching TV and incoming call is present you can always see caller identity displayed on TV. You can chat with your friends while you watch your favorite football match. You can share your comments instantly.

Easy to install.

Connecting the Innbox Media Center to your HDTV is as easy as hooking up your traditional SetTopBox or a DVD player.

Key Features and Benefits

- New innovative generation set-to-box: delivering operators IPTV content and sharing local content on the same device
- Superior graphical user interface and content navigation
- Full HD support (1080p)
